

## GEMINI

MAY 21 - JUN 20

Born with the need to communicate, Gemini is the sign of the social butterfly. Driven to "know" - they possess a genuine inquisitiveness, curiosity and desire to understand how people and things work. They need to gather tidbits, information and facts, sharing these with anyone who might listen to what they have to say. A sign of contradictions, there is an intriguing duality to Gemini whereby their social and communicative traits are juxtaposed against their erratic and even restless tendencies. This combination contributes to a versatile, fun loving, and quick-witted social character who knows how to talk the small talk, finding shades of grey in every apparent absolute.
