

TAURUS

APR 20 - MAY 20

Essentially creatures of comfort, Taureans take the art of relaxation to heights all of their own. Lovers of all things sensual and of good quality, Taureans are likely to be found in the day spa, the restaurant or simply in bed. As lovers of all things fine and natural, they appreciate quality things like good food, good wine and very good sheets. Comfort is paramount. They will do anything to feel good. Material security and stability is also important for Taurus. With enough money to meet their physical needs, they would prefer to take life one-step at a time rather than jump into anything extreme. They dislike change and so can often end up stuck in a rut, but as the true bon-vivants of The Zodiac, they are dependable, good natured, and the most loyal of friends.
