

PISCES

FEB 19 - MAR 20

Known as the official dreamers of The Zodiac, Pisces like nothing more than the chance to drift off on a moonbeam. Idealists with a humanitarian edge, they are known for their selflessness, creativity and empathy for others. Typically talented, they often have a strong affinity for abstract art forms, especially music, cinema and dance. Their intuition is second to none, and they "pick up on vibes" like a sponge absorbing water. As much as they can be "people-people" they also need time alone. They enjoy nature, being by the water, or taking time out to go within. As the last sign of the Zodiac, Pisces are visionary people with a mystical edge, and are most certainly unique.
