

LIBRA

SEP 23 - OCT 22

Peace loving, socially aware, and most often well-dressed, Librans are the most balanced members of the Zodiac. Symbolically represented by The Scales, social principles such as fairness, justice and equality are important components of the Libran life. As a highly sociable sign, they need to build relationships and connect with others. In fact, finding harmony through relationship is absolutely paramount. Librans work better with others, seeking wherever possible to collaborate and get the job done. Other peoples' input gives Librans the reflection that they need, and helps them strategize for optimal results. Librans like style and great design, so symmetry, proportion, and coordinated tones are essential ingredients for Libran equilibrium.
